

Land Ownership Conrad, MT

Map 4

Land ownership information shown on this map is derived from the Montana cadastral survey data. The cadastral data is a framework built primarily upon the measurement-based cadastral reference of the Geographic Coordinate Database (GCDR) maintained by the BLM, with tax parcels as defined by the Dept. of Revenue.

The Cadastral NSDR/MSDI simplifies subtleties in land ownership by providing cadastral information in different components, cadastral reference (GCDR PLUS in Montana), parcels, and related coincident geometry (trust lands, stipulations, subsurface rights, boundaries, etc.) which all carry a core set of information. Other spatial data (base maps) were obtained from the Montana Geographic Information Clearinghouse - Montana Natural Resource Information System (NRIS).

This map was prepared September 2010 by Global Positions, LLC as part of the Pondera County Growth Policy Project.

Projection: Lambert Conformal Conic
 Coordinate System: State Plane, Zone 1200
 Units: Meters Datum: NAD83
